Job 322 Works Freight House and Patch

On duty at First St. engine track.

Cars for Freight House are on track 3. Spot loads on inbound track (doors), empties on outbound track (platform).

Cars for Patch tag 22 are on track 2. Banana house may require multiple switch, allow one hour before re-spot unless advised otherwise by loading foreman.

Pulls from Patch to be classified/blocked on track 2.

Off duty at First St. engine track.

General Instructions

Track 1 runaround to be kept clear of standing cars at all times. Do not leave cars standing under Fourth Street viaduct, on curve between buildings west of Fourth or on lead to Freight House.

Avoid allowing engine to stand for any length of time under Fourth Street viaduct.

Due to impaired clearance on curve between buildings west of Fourth Street viaduct, visual signals cannot be passed. Crew on the ground and engineer are to plan moves carefully, using agreed-upon times between moves.

Freight House door numbers are counted from First Street, starting at 1 (one).

Partially unloaded cars requiring re-spot are to be placed at original spot, unless otherwise directed by Freight House foreman.

Company tank cars with Diesel fuel are to be spotted at east end engine track to allow unloading at standpipe.

Line up cars for Patch in proper order to avoid unnecessary moves in Seventh Street alley.

Notify yardmaster of any cars not properly spotted.
